GentaMed™-P for Poultry
(gentamicin sulfate, USP)
Injection

50,000 Doses • Sterile Solution
FOR USE IN POULTRY

ANADA 200-468, Approved by FDA

Anti-Infective for day-old chickens and 1 to 3 day-old turkeys.

INDICATIONS

Chickens: GentaMed™-P for Poultry Injection is recommended for the prevention of early mortality in day-old chickens associated with *Escherichia coli*, *Salmonella typhimurium*, and *Pseudomonas aeruginosa* susceptible to gentamicin sulfate.

Turkeys: As an aid in the prevention of early mortality of 1 to 3-day-old turkeys associated with *Arizona paracolon* infections susceptible to gentamicin sulfate.

BENEFITS

• Approved for use in day-old chickens and 1 to 3 day-old turkeys
• Does not require refrigeration
• Approved for subcutaneous use only
• Each 100 mL vial treats 50,000 chickens or 10,000 turkey poults
• Safe: Approved by FDA

**GentaMed™-P for Poultry**  
(gentamicin sulfate, USP)  
Injection  
50,000 Doses • Sterile Solution  
FOR USE IN POULTRY  
ANADA 200-468, Approved by FDA

**Restricted Drug (California)-Use Only as Directed**

**NOT FOR USE IN HUMANS**

**KEEP OUT OF REACH OF CHILDREN**

100 mg/mL

Anti-Infective for Day-Old Chickens and One to Three-Day Old Turkeys

FOR SUBCUTANEOUS USE ONLY.

**DESCRIPTION:**

Each mL of GentaMed™-P for Poultry Injection contains gentamicin sulfate, USP equivalent to 100 mg gentamicin base; 3.2 mg sodium bisulfite; 0.1 mg edetate disodium; 4.5 mg sodium acetate, anhydrous; 3.0 mg glacial acetic acid; 0.8 mg methylparaben and 0.1 mg propylparaben as preservatives; water for injection q.s.

**CHEMISTRY:**

Gentamicin sulfate, USP is a bactericidal aminoglycoside antibiotic derived from *Micromonospora pupurea* of the Actinomycetes group. It is a powder, readily soluble in water and basic in nature. Gentamicin aqueous solutions do not require refrigeration and are stable over a wide range of temperatures and pH.

**INDICATIONS:**

Day-old chickens: Chickens: GentaMed™-P for Poultry Injection is recommended for the prevention of early mortality associated with *Escherichia coli, Salmonella typhimurium,* and *Pseudomonas aeruginosa* susceptible to gentamicin sulfate.

Turkeys: As an aid in the prevention of early mortality of 1 to 3-day-old turkeys associated with *Arizona paracolon* infections susceptible to gentamicin sulfate.

**DOSAGE AND ADMINISTRATION:**

**Chickens:** Each day-old chicken should be aseptically injected subcutaneously in the neck with GentaMed™-P for Poultry Injection diluted with sterile physiologic saline solution to provide 0.2 mg gentamicin in a 0.2 mL dose. This concentration can be provided by diluting GentaMed™-P for Poultry Injection as follows:

Turkeys: Each 1 to 3-day-old turkey should be aseptically injected subcutaneously in the neck with GentaMed™-P for Poultry Injection diluted with sterile, physiologic saline solution to provide 1 mg gentamicin in a 0.2 mL dose. The dose should be injected under the loose skin on top of the neck, halfway between the head and the base of the neck. This concentration can be provided by diluting GentaMed™-P for Poultry Injection as follows:

</table>

Clean and sterilize needles and syringes by boiling in water for 15 minutes prior to use.

Disinfect the injection site and top of the bottle with a suitable disinfectant, such as 70% isopropyl alcohol. Use all the precautions to prevent contamination of vial contents.

**RESIDUE WARNING:**

Chickens injected with GentaMed™-P for Poultry Injection must not be slaughtered for food for at least 5 weeks following treatment. Turkeys injected with GentaMed™-P for Poultry Injection must not be slaughtered for food for at least 9 weeks following treatment.

**HOW SUPPLIED:**

GentaMed™-P for Poultry Injection 100 mg/mL is available in 100 mL, multiple-dose vials.

**STORAGE:**

STORE AT 20°C - 25°C (68°F - 77°F), excursions permitted between 15°C and 30°C (between 59°F and 86°F). Protect from freezing.
