TOP REASONS TO CHOOSE TRIANGLE® VACCINES FOR YOUR HERD

▲ Safe for all ages and stages, giving you the confidence of proven protection
  • Contains only killed antigens
  • Safe for use in pregnant animals regardless of previous vaccination history

▲ Pioneer killed viral vaccine with dual-strain BVD protection
  • Diversity of strains specifically chosen for optimal BVD protection
  • Demonstrated protection against BVD Type 1 and Type 2 challenges\(^1\)
  • Contains the same BVD strains as Pyramid® modified-live virus (MLV) vaccine family

▲ Dual adjuvant system to enhance immune response
  • Multiple adjuvants optimize immune system recognition
  • Demonstrated advantages when used with a PYRAMID preconditioning protocol\(^2\) and PYRAMID prebreeding protocol\(^3\)

▲ Increased flexibility
  • Can be administered subcutaneously (Sub-Q) or intramuscularly (IM)
  • Short meat withhold (21 days)
  • Ready to use — No mixing required
  • No label precautions on milk reduction and transient depression
