Vetmedica Administrative Building
Defining the Concept to More Effective Disease Management in Swine

Providing Practical, Applied Solutions for Greater Profits

An animal health company should provide more than just products to help its customers. That’s why the Boehringer Ingelheim Vetmedica, Inc. (BIVI) Swine Division is dedicated to providing both effective vaccines and practical, research-proven solutions that prevent disease and result in healthier, productive pigs.

Prevention Works is our unique, proactive approach to swine health that combines our innovative vaccine portfolio with science-based disease control strategies.

Our commitment is to not only provide the products, but the vast knowledge and experience of our experts and our extensive research, diagnostic services and training programs that veterinarians and pork producers need to more effectively minimize disease transmission, maximize immunity and optimize profitability.

Through Prevention Works, we are shaping the future of swine health in ways that allow us to provide proactive, customized solutions to swine health problems facing our veterinary and producer customers.

Innovative Product Solutions - In the

Ingelvac®ERY-ALC  Ingelvac®PRV-G1  Ingelvac®AR4  Enterisol® SC-54 NF  Ingelvac PRRS® MLV

maximize immunity and optimize profitability. We need to more effectively minimize disease transmission, and our expertise and training programs that veterinarians and pork producers can use, and our extensive research, diagnostic services and the vast knowledge and experience of our experts are the cornerstones of our commitment to not only provide the products, but also to offer science-based disease control strategies.

Prevention Works is our unique, proactive approach to swine health and production profitability. It is our program that combines our innovative vaccine portfolio with science-based disease control resources.

The Portfolio Solutions Team
The Portfolio Solutions Team (PST) is a group of highly trained experts in the field of disease epidemiology. Because collaboration is key to success, our teams work with stakeholders to develop and implement strategies such as Area Regional Disease Control (ARC) to help manage disease on a large scale basis.

BI Training Center
In addition to our products, we provide customers with a number of training programs designed to help them more effectively prevent disease and improve profitability of their operations. Examples of our training programs include DVM Swine Academy and Oral Vaccination Learning Program™.

Customized Research Solutions
Research is the cornerstone of all successful disease management strategies. We provide a wide variety of customized research services, such as field trials, SPC charting and data management, to help customers evaluate various disease control strategies within their own systems.

Health Management Center
The BIVI Swine Health Management Center (HMC) is one of the leading swine-specific diagnostic laboratories in North America. This state-of-the-art, ISO 17025-accredited laboratory collaborates with BIVI’s Field Research Services and Professional Service Veterinarians to link diagnostics and production performance metrics.

Professional Account Teams
Prevention Works begins with knowledgeable, highly-experienced account managers and Professional Service Veterinarians who work as a team to understand each customer’s production system and disease problems in order to provide the most effective solutions.

In the past 30 years, BIVI has developed many of the swine industry’s most effective vaccines and innovative delivery systems to help prevent diseases. These include:

- ReproCyc® PRRS-PLE
- Ingelvac PRRS® ATP
- Enterisol® SC-54 FF
- Enterisol® Ileitis FF
- Enterisol® Ileitis FF
- Ingelvac MycoFLEX®
- Ingelvac CircoFLEX®
- Ingelvac PRRS® ATP
- Enterisol® Ileitis
- Ingelvac CircoFLEX®

BIVI provides the unique knowledge, products and technical support and customized solutions they need to help improve a customer’s overall production and profitability. The true value to any production partner goes beyond the products they sell. It’s in the industry knowledge, research, service and the experience of BIVI’s account managers and Professional Service Veterinarians that make all the difference.

Innovative Product Solutions – Greater Profits
Providing Practical, Applied Solutions for Advanced Disease Management Concepts

In the last three decades, BIVI has collaborated with some of the world’s leading swine veterinarians, universities, producers and practitioners to develop results-oriented solutions to swine health problems facing the industry. With BIVI’s Preventive Management System, we’re helping to shape the future of swine health in ways that provide the greatest return value to customers and help improve economics and sustainability.
In the last three decades, BIVI has collaborated with universities, producers and practitioners to develop impactful disease management programs. These include:

- **hmc** - 1997
- **PRRS Risk Assessment** - 2002
- **PRRS Research Award** - 2003
- **OVLP** - 2004
- **ARC** - 2007
- **Disease BioPortal** - 2008
- **PEDv Applied Research Grant** - 2009
- **SVMC ACADEMY** - 2011
- **2014**

### Advanced Disease Management Concepts

In the past 30 years, BIVI has developed many of the swine industry’s most effective vaccines and innovative delivery systems to help prevent diseases. These include:

- **ReproCyc® PRRS-PLE**
- **Enterisol® SC-54 NF**
- **Ingelvac® CircoFLEX - MycoFLEX®**
- **Enterisol® Salmonella T/C**
- **FLEXCombo®**
- **3FLEX® with HSB, 50 Dose**

### A Commitment to Results that Return Value to Customers

The true value to any production partner goes beyond the products they sell. It’s in the industry knowledge, technical support and customized solutions they provide that help improve a customer’s overall production and profitability.

Boehringer Ingelheim Vetmedica, Inc. (BIVI), is committed to shaping the future of swine health. BIVI provides the unique knowledge, products and support services producers and veterinarians need to minimize disease transmission, maximize immune response and optimize profitability.
BIVI is proud to offer an innovative vaccine portfolio due to an unparalleled investment in developing state-of-the-art research facilities across the globe. Our 100 percent vaccine-focused research team has unprecedented access to new and upcoming pathogens.
