Introducing the new blueprint for fast, effective treatment of otitis externa in dogs.

**Flexible Nozzle:**
Gentle on sensitive canine ears.

- One pump delivers an exact 1 mL dose every time.
- No messy drops to count. No more mystery.

**Unique Airless Delivery System:**
- One pump, once daily, for 5 days for any size dog.
- Eliminates dosing frustration.

**Three Powerful Actives**
- Contains Hydrocortisone Aceponate (HCA) - High topical potency comparable to betamethasone valerate¹ and mometasone furoate².
- Favorable benefit/risk ratio¹.
- Rapid onset of action.
- Combined with gentamicin and miconazole.

- **CAUTION:** Federal law restricts this drug to use by or on the order of a licensed veterinarian.

**Ease and otic together at last.**
With 1 in 6 dogs suffering from otitis externa, it’s time to redesign treatment.

- **Pet owner treatment compliance** can be a major barrier to successful clinical outcomes.
- **Unique design eliminates dosing challenges of traditional treatments:** Precise 1 mL dose, 1x daily for 5 days.
- **Proven to dramatically increase compliance:** 79% of pet owners completed treatment with EASOTIC Suspension, compared to 21% with Surolan® (miconazole nitrate, polymyxin B sulfate, prednisolone acetate); scored 100% in overall satisfaction.1

EASOTIC Suspension is contraindicated in dogs with known or suspected hypersensitivity to corticosteroids, imidazole antifungals, or aminoglycoside antibiotics. Do not use in dogs with known tympanic membrane perforation. The safe use of EASOTIC Suspension in dogs used for breeding purposes, during pregnancy, or in lactating bitches has not been evaluated.

**Triple-active formula of EASOTIC® (hydrocortisone aceponate, miconazole nitrate, gentamicin sulfate) Suspension adapted for rapid, effective relief from inflammation and infection.**

Features **HCA** (hydrocortisone aceponate), a new generation glucocorticoid ideally suited for otitis externa:

- **Potent:** rapidly reduces inflammation in the external ear.
- **Highly lipophilic:** Quickly penetrates epithelial layer for fast, effective concentrations in the skin.
- **Well tolerated** with low capacity to induce skin atrophy.2

Formulated with two proven actives to fight bacteria and yeast: gentamicin and miconazole.

EASOTIC Suspension is contraindicated in dogs with known or suspected hypersensitivity to corticosteroids, imidazole antifungals, or aminoglycoside antibiotics. Do not use in dogs with known tympanic membrane perforation. The safe use of EASOTIC Suspension in dogs used for breeding purposes, during pregnancy, or in lactating bitches has not been evaluated.

**FEWER DAYS + HAPPIER CLIENTS = BETTER OUTCOMES.**

**Ease and otic together at last.**
